Mission Statement

Hair analysis done by a 3rd party not JV health services

We provide a hair analysis and dietary supplements for the purpose of education in nutrition, diet, exercise, research. Each report is testing for over 200 toxic elements, all of the internal organs, and the muscular skeletal systems. The report is not intended as a substitute for medical advice. The findings are for educational purposes only and are not intended to diagnose, treat, cure, or prevent any disease. Each recommendation given is from years of research involving micro-nutrition as found in the Materia Medica and the Kent Repertory. They are intended solely for the purpose of supporting and balancing bodily functions and the use of them is up to each individual's own discretion.
